Applications Developed

Live Face Off - [Live](#) | [Github](#) 2018

- Developed as an initial prototype for a client, Live Face Off is a multiplayer web application where people around the world can play team-based games with live web cams and chat room support.
- Responsible as the **Front-end Developer** of the project and utilized the **React** and **Redux** JS libraries to create and display content.
- Technologies used to create the application include **HTML5**, **CSS3**, **MaterializeCSS**, **React**, **Redux**, **Node.js**, **Express**, **Socket.io**, and TokBox Web Cam API.

Cuphead Memory Match - [Live](#) | [Github](#) 2018

- A memory match game with a theme based on a game called Cuphead, which includes features such as **responsive design**, statistic tracking, and **CSS3** animations.
- Created using **HTML5**, **CSS3**, **Javascript** and with object orientated programming using the Model-View-Controller concept.

Surfs Up - [Live](#) | [Github](#) 2018

- A web application where users can search any beach location to find the surf statistics and weather information for the area.
- Created with **HTML5**, **CSS3**, **Javascript**, **jQuery** and **responsive design**.
- Implemented Google Geo Location, Flickr, and World Wide Weather APIs using **AJAX**.

Professional Experience

United States Air Force - *Space Operator* 2015 - 2017

- Assisted in training all incoming space operators by utilizing proprietary software for new operators to experience satellite and missile warning events.
- Promoted to Senior Airman within 2 1/2 years of service.
- Augmented Air Force Security Forces as backup manpower in base training exercises to ensure successful operations.
- Provided services to Buckley postal center and processed 50,000+ pieces of incoming and outgoing correspondence.

UPS - *Delivery Driver Assistant* 2014

- Assisted with the coordination of organizing and delivering packages in a timely manner.
- Utilized proprietary software on a device for tracking items and record keeping.
- Demonstrated excellent customer service to all customers.

Education

LearningFuze - *Accelerated Web Development Program* 2017-2018

- Devoted over 800+ hours to learning Web Development practices and technologies, developing various web applications, and collaborating using the **AGILE** and **SCRUM** methods.

Cal Poly Pomona - *B.S. Computer Information Systems* 2017-Present
